Summary

Motivated and detail-oriented Computer Science Engineer with hands-on experience in Python, Django, SQL, and web application development. Developed academic and internship projects involving workflow management, dashboards, and database-driven systems. Quick learner with strong problem-solving, communication, and teamwork skills, seeking opportunities in Software Engineering and data-focused roles.

Education

Bachelor of Engineering in Computer Science and Engineering

Bethlahem Institute of Engineering, Anna University , Chennai

2022 – 2026 | CGPA: 8.6/10.0

Skills

Programming : Python (Pandas, NumPy, Matplotlib, Seaborn, Scipy)

Front-End: HTML, CSS ,JS, React.js

Back-end : Django

Tools: Excel, Power BI, Tableau, Git hub, VS Code, Postman

Database: MySQL

Soft Skills : Communication, Time Management, Teamwork, Work Ethic

Experience

Zata Tech Solutions , Kanyakumari

Jan 2026- May 2026

Python Full stack Intern (On-site)

- Developed a Smart Office Management System using Django and MySQL to streamline administrative operations and employee workflow management.
- Implemented admin dashboard, employee record handling, and role-based authentication functionalities.
- Performed backend development, database integration, CRUD operations, testing, and debugging for efficient system performance.

IPCS Global, Trivandrum

Jun 2025 – Aug 2025

Data Analytics Intern (On-site)

- Performed EDA on 100K+ climate records, identifying global warming trends using Python (Pandas, Seaborn).
- Cleaned and analyzed data using Pandas and NumPy, improving data consistency.
- Created visualizations using Matplotlib and Seaborn to communicate insights effectively.

Certifications

- Python for Data science by NPTEL
- Data Analytics – Cad point Authorized Training Centre , Marthandam

Projects

Smart Office Management System

Feb 2026 – Apr 2026

- Developed backend APIs using Django REST Framework.
- Managed office-related records through secure backend services.
- Performed database integration and CRUD operations.

Global Land Temperature Analysis using Python

Jul 2025 – Aug 2025

- Conducted analysis to study temperature trends across regions.
- Created visualizations using Matplotlib and Seaborn to communicate insights effectively.
- Interpreted insights related to global warming and environmental changes.

Health Monitoring and Diagnosis using Python, ML

Mar 2025 - Apr 2025

- Developed an ML model predicting heart disease risk using patient clinical data.
- Built a Python UI for patient input and prediction output.
